About Myself

I am a backend developer with one year of self-study and six months of **intensive training at WeHelp Academy**. I enjoy breaking down problems and understanding how things work step by step. This mindset drives my approach to backend development using **Python** and the **FastAPI**. With these skills, I have built and deployed two backend projects independently.

SKILLS

◆BACKEND

- Python (FastAPI)
- WebSocket
- RESTful API
- MySQL

◆AWS

- S3
- RDS
- CloudFront
- ALB

◆DEVOPS & TOOLS

- Git
- GitHub Action
- Linux
- Docker
- Nginx

◆FRONTEND

- HTML
- CSS
- RWD
- JavaScript

◆Backend Hightlights

- Solid grasp of Python fundamentals, including core language features, **basic OOP**, and **data structures**; able to build backend applications with **FastAPI**
- Built RESTful APIs with FastAPI and Pydantic for **data validation**, **processing**, and **system logic**
- Implemented real-time communication using **WebSocket**, handling **connection management**, **state synchronization**, and **basic conflict control** in multi-user scenarios
- Designed MySQL schema and **permission models**, and deployed containerized backend services to AWS (EC2/RDS) via **Docker** and **GitHub Actions CI/CD**

CODING EXPERIENCE

Web Trainee, WeHelp Academy | Taiwan

Oct 2025 - Apr 2026

- Built a solid foundation in **JavaScript**, **Python**, **MySQL**, and **FastAPI** through an intensive, self-driven full-time training program, guided with challenges rather than step-by-step instructions
- Collaborated with other trainees on group exercises and projects, **Git version control**, and **GitHub-based collaboration workflows** (branching, pull requests, and code reviews)
- Developed a basic e-commerce web application from professional requirements, implementing RESTful APIs, **user authentication**, **data management**, and **database integration**
- Designed and built a personal **full-stack project from scratch**, practicing end-to-end development, backend architecture, and applying creative solutions to technical challenges

WORK EXPERIENCE

Nitori | Taiwan

Sep 2021 - Oct 2025

MANAGEMENT ASSOCIATE in Photo Studio

May 2024 - Oct 2025

- Produced approximately 80% of the product images for the company's e-commerce platform, including large furniture and home decorations and managed daily operation of the photo studio
- Collaborated with external professional studio to make the seasonal product catalogs
- Performed post-production, including image editing and retouching using Adobe Photoshop and Lightroom

MANAGEMENT ASSOCIATE in Stores

Sep 2021 - Apr 2024

- Managed daily store operations and resolved customer issues to ensure high service quality
- Took responsibility for daily decision-making and operational tasks during peak hours
- Maintained store order and efficiency during high-traffic periods
- Communicated and coordinated with other stores and mall supervisors

EDUCATION

National Sun Yat-sen University (NSYSU)

Sep 2017 - Jun 2021

Bachelor of Foreign Language and Literature

- TOEIC: 865
- Exchange student in Germany for one semester

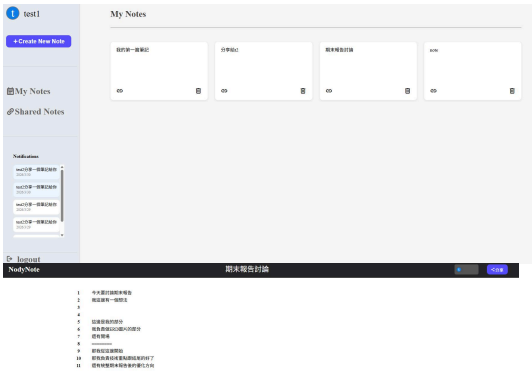
PORTFOLIO

Nodynote

A collaborative note-taking system using FastAPI/WebSocket, with role-based permissions, basic conflict handling, and memory-managed periodic DB updates

https://github.com/pervertcoder/Personal_Project_nodynote

https://nodynote.com/



- Developed backend for a multi-user collaborative note-taking system using **FastAPI**, implementing **JWT authentication** and **role-based access control** (owner/editor/viewer)
- Designed **line-by-line version control** to manage concurrent edits and **prevent data loss**, ensuring overall data consistency
- Implemented in-memory state management with **periodic persistence**, **reducing database load** under high-frequency updates
- Deployed the application on AWS with **CI/CD** by GitHub action

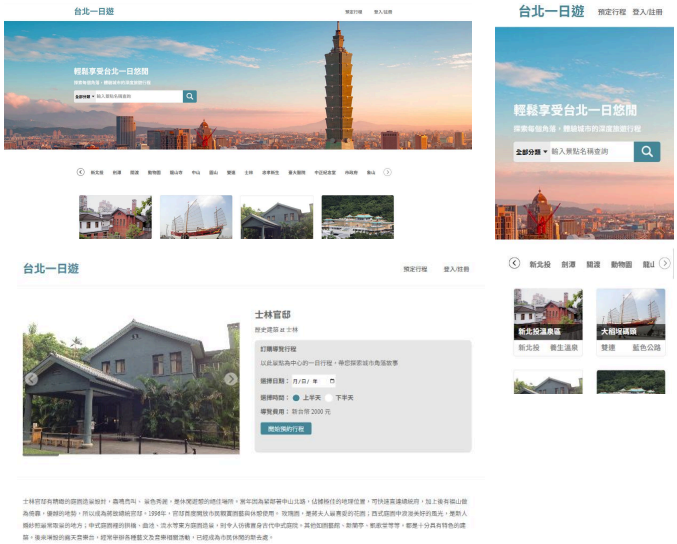
FastAPI # Nginx
WebSocket # Docker
AWS # MySQL

Taipei Day Trip

An e-commerce travel website for exploring tourist attractions in Taipei and facilitating the booking of sightseeing trips

https://github.com/pervertcoder/Taipei-Day-Trip

https://practice.nodynote.com/



- Developed RESTful APIs for attractions, booking, and order management using **FastAPI**
- Implemented user authentication and authorization with **JWT**
- Integrated **third-party APIs** for attraction data and payment processing
- Designed **MySQL** database schema for users, bookings, and orders
- Built responsive frontend using HTML, CSS, and JavaScript
- Deployed the application on **AWS** with version control via **GitHub**
